

Did you know?

**There are over 10 venue management systems at Monash.**

And all of them work differently.

Want to organise a BBQ?

**Have you thought about:**

Who owns the venue?

Do you need bins?

Are we serving alcohol?

Is it open to the public?

Is it after hours?

How do I book a venue/space for my event?

Do I need approvals from anywhere?

And all the tasks need to be done sequentially.

We made it better.

# Introducing

# e✓entually

The image shows a desktop browser window and a smartphone displaying the eVentually website. The desktop view shows a detailed event page for "Eric's Awesome Event" on April 6, 2019, with a "Catering" section containing four tasks. The smartphone view shows the same information, demonstrating the app's responsive design.

**Event Details:**

- Event Name: Eric's Awesome Event
- Date: April 6, 2019 6:07 PM - April 6, 2019 6:07 PM

**Catering Tasks:**

- Allocate Budget
- Find suitable catering
- Order catering
- Pay catering company

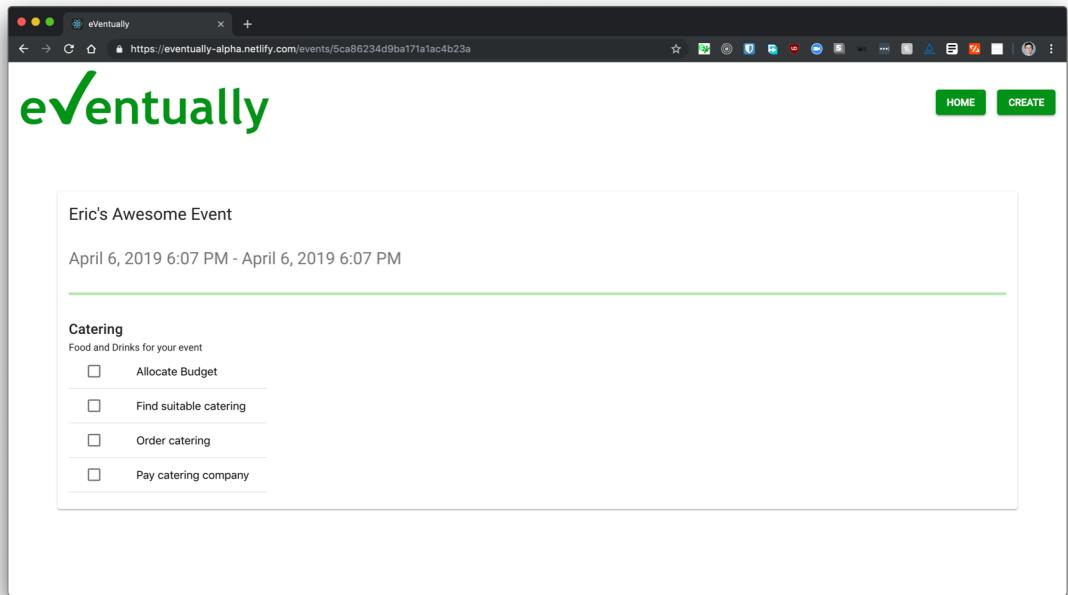

**Buttons:**

- HOME
- CREATE

**Smartphone View:**

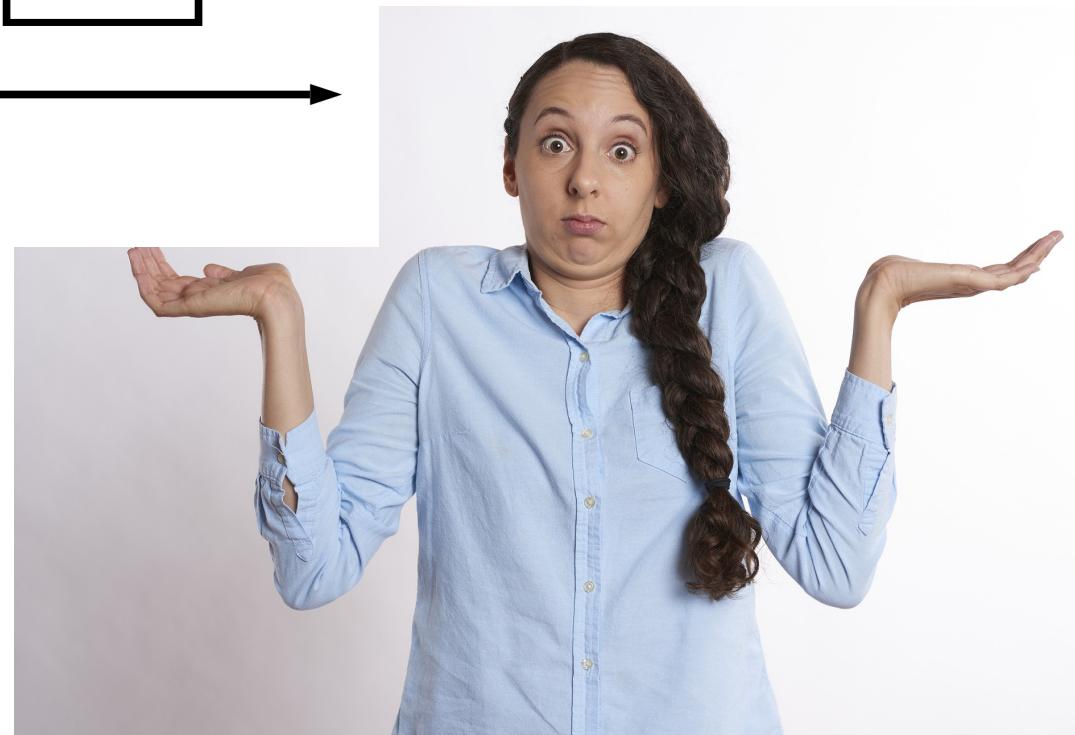

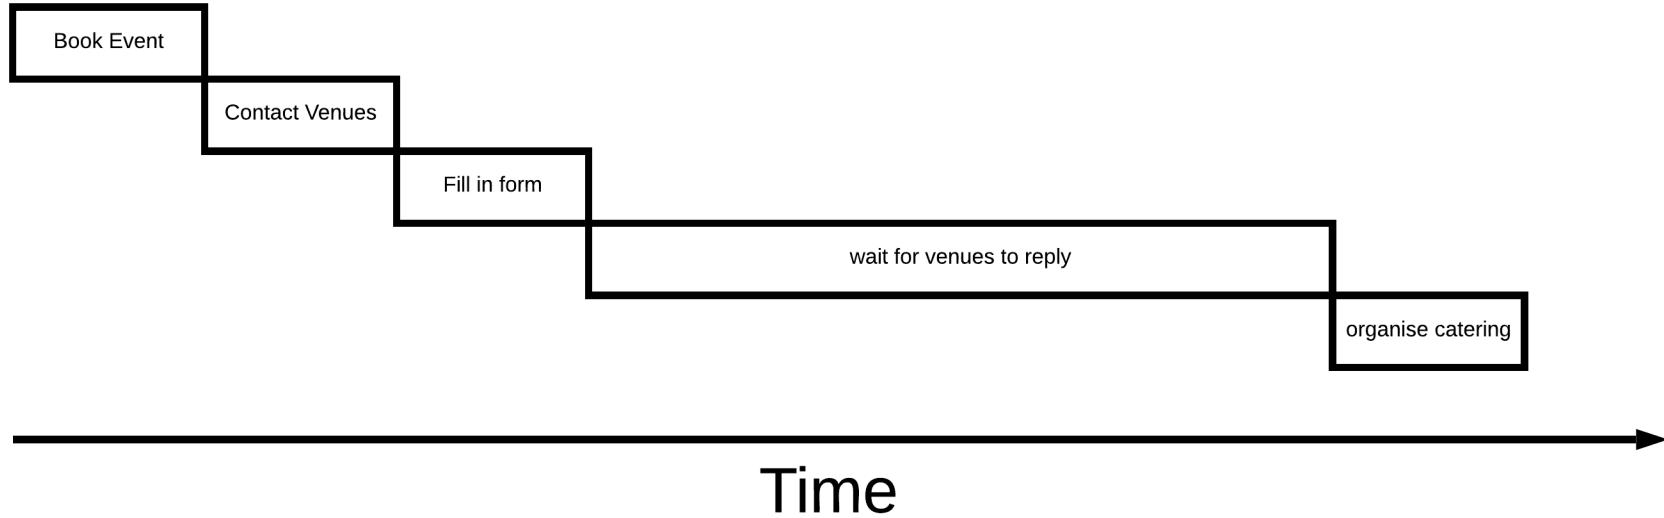

- Event Name: Eric's Awesome Event
- Date: April 6, 2019 6:07 PM - April 6, 2019 6:07 PM
- Catering Tasks (same list as desktop):

# Workflow management made easier

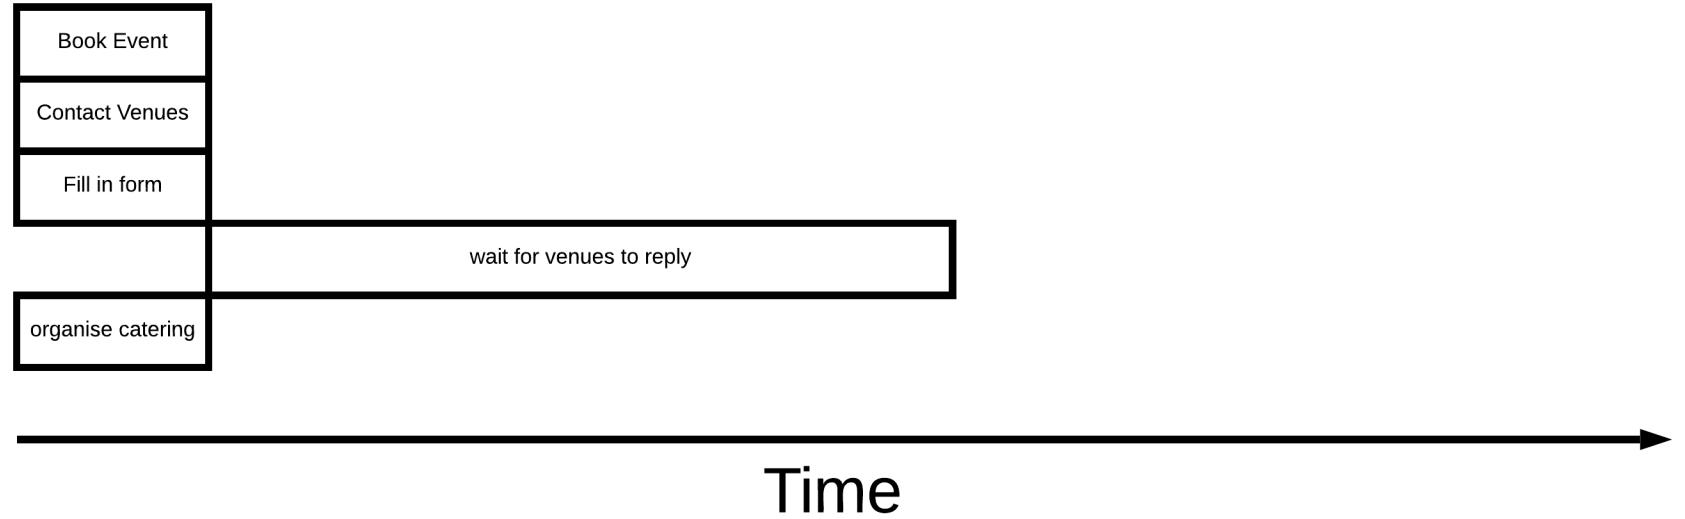

- Tasks now can run in parallel instead of step-by-step
- Sign-off can be assigned to groups within the business
- Every event has its own requirements
- See your current tasks
- Find bottlenecks within your business

# eVentually changes this...

# Into this...

Planning events has never been easier.

It's literally workflows on steroids.

Pretty. Powerful.

eVtually is modular, and can be applied on many use cases

Government Forms  
Staff Inductions  
Financial Systems  
Getting Products into Production  
and more...

# The Awesome Team
